

Attic Roof Vent: IN-Vent

IN-Vent attic roof vent is an on-the-rooftop, intake ventilation product that lets fresh air in when traditional soffit vents are out. IN-Vent is ideal for roofers and remodelers who need to add attic roof intake ventilation to balance their ridge vents, but can't access the soffits or overhangs.

Attic Roof Vent: Key Benefits

- Low 1" profile makes it blend in with the roof.
- 10 square inches NFVA per lineal foot perfect for use with our V-300 or Fold-A-Vent ridge vents.
- Made from sturdy PP material so it won't compress during or after installation.
- Enhanced Snow Screen will let air in while keeping weather out.
- Nails and end caps included in carton.
- Can be used on roof pitches of 3/12 or greater
