Metal Roofing Made for the Northwest

SOUND BUILDING
S U P P L Y

With over 150 years of combined experience in the roofing industry, Sound Building Supply provides exceptional quality metal building products and the most knowledgeable customer service in the Pacific Northwest.

The Best Choice for Your Roofing Needs

Metal Roofing Made for the Northwest

In the Pacific Northwest year-round weather can vary greatly, testing even the toughest roofing materials on the market. **Sound-Lok** metal roofing system is backed by the industry's best Sound Total Care™ 50-year warranty.

Whether you live on the Pacific coast, east of the Cascades or anywhere in between, **Sound-Lok** metal roofing will provide you with a dependable, attractive and environmentally smart alternative to composition, slate or tile roofing materials.

The Benefits of Sound-Lok™ Roofing

With so many options available when it comes to deciding what type of roofing to use, compare the following advantages of **Sound-Lok** metal roofing.

Beauty The **Sound-Lok** hidden-fastener installation system creates a sleek finished roof profile. Our popular panel styles and a wide array of distinctive colors offer choices to compliment each home's unique architectural style.

Longevity Discover the durability of **Sound-Lok** roofing panels. They will not crack, shrink, chip, attract moss, rot or erode. With our Sound Total Care™ 50-year warranty, you'll have the peace of mind that your home is well protected. This longevity also makes a **Sound-Lok** metal roof a very cost effective investment over an asphalt roof which typically needs replacing every 10 to 20 years.

Strength Despite it's light weight, a **Sound-Lok** metal roof can handle heavy snow loads and extreme wind conditions. Our standing seam system is designed to be a self-locking seal that safeguards your home from the ever-changing elements.

Fire Resistant **Sound-Lok** metal panels offer a high degree of protection from wind-blown embers. It's another way to keep your home and family safe.

Environmentally Friendly You can count on a **Sound-Lok** roof to be a smart choice for our planet. It's 100% recyclable and made from long-lasting steel and coatings which means less re-roofing waste going to landfills.

Low Maintenance Enjoy the minimal care required by a **Sound-Lok** metal roof. Since our panels resists both moss and algae, they are simple to clean and maintain.

Energy Efficiency Coated metal roofing systems not only reflect solar energy but also cool your home by re-emitting most of what solar radiation is absorbed. Our Energy Star coatings help save the cost of heating and air conditioning.

Pencil Rib

Sound-Lok Pencil Rib profile is the most popular interlocking panel produced in our market, making it easily recognizable in many different applications.

The **Sound-Lok** proprietary fastening system is unique to the industry. This design adds strength and durability to your roof. It also allows for expansion and contraction without the need for clips.

Our **Pencil Rib** panels are available in both 12" and 16" sizes. Choose from a variety of vibrant colors. Please consult your **Sound-Lok** representative for more information about this roofing product.

Striated

Sound-Lok Striated panel offers an enhanced architectural design to the classic *Flat Panel* form. The striations running parallel on the metal roofing create a subtle aesthetic highlight on the panel, adding a unique appearance to your metal roof. This panel retains all of the **Sound-Lok** unique design features, making your roof the best in the market.

The **Sound-Lok** proprietary fastening system is unique to the industry. This design adds strength and durability to your roof. It also allows for expansion and contraction without the need for clips.

Our **Striated** panels are available in both 12" and 16" sizes. Choose from a variety of vibrant colors. Please consult your **Sound-Lok** representative for more information about this product.

Flat

Sound-Lok Flat panel is a high quality, self-locking standing seam roofing system. The standing seam design is water-tight, and creates a sleek appearance.

The **Sound-Lok** proprietary fastening system is unique to the industry. This design adds strength and durability to your roof. It also allows for expansion and contraction without the need for clips.

Our **Flat** panels are available in both 12" and 16" sizes. Choose from a variety of vibrant colors. Please consult your **Sound-Lok** representative for more information about this roofing product.

Toughest Materials and Coatings

Sound-Lok panels are manufactured from industry select steel chosen by our product experts. Panels come in 12" or 16" widths and are available in long lengths that work for most residential roof designs. They are light weight for less structural load yet strong and durable protection for your home.

The quality of the coatings can make all the difference in how your roof resists weather and solar radiation. Our premium coatings offer state-of-the-art performance in resistance to sunlight, abrasion and temperature.

They are available in a wide assortment of popular colors.

Sound-Lok™ Roofing System

Our concealed fastener, standing-seam roofing system is well suited to residential and commercial roofing applications where durability, long-term energy saving and aesthetics are primary considerations. This self-locking seal keeps your home protected and provides a clean, fastener-free appearance.

The Finishing Touches

Sound-Lok offers a variety of flashing and trim accessories to complement the look of your roof. All of our color-matching roofing accessories are designed for easy installation and can be used in any residential or commercial application.

Each piece is manufactured in house or locally sourced for consistency and accuracy, providing you with the finest material on the market.

Lifetime Protection

Your home and family deserve the best. That's why selecting **Sound-Lok** metal panels for your next roof is the perfect choice. Beauty, longevity, protection and the industry's best Sound Total Care™ 50-year warranty.

Another Proven SBS Roofing and Siding Product

Tuff Rib

As the name implies this is a “tuff” panel, designed for strength and durability. This exposed fastener roof system is installed quickly and can be used on a variety of building applications, both over framing and solid substrates. The panel is designed with anti-siphon grooves, allowing for simple and effective application. **Tuff Rib** panel’s sturdy design can be used in siding applications, for shops, garages, and barns.

Tuff Rib panels are available in a variety of vibrant colors. Please consult your **Tuff Rib** representative for more information about this roofing and siding product.
